Services We Offer

Basements

The solution for this lies in choosing right Waterproofing System. Negative side waterproofing is also possible using Crystallization Method.

Podium Slabs

Proper waterproofing system helps to keep out water and pollutants thereby preventing leakages and also protecting structural elements.

Swimming Pool

Swimming Tanks are always filled with water so its waterproofing is mandatory.

Services We Offer

W/C/ Bathrooms

Bathrooms and Toilets are exposed to water and moisture daily. Dampness emerged here damage its internal walls as well as external walls.

Main Terraces

A terrace is the place which bears severe weather conditions throughout the year. Our terrace waterproofing service is highly admired for its quality and on time completion attributes.

Water Tanks

Waterproofing of the overhead water tanks is of utmost importance. & provided with specialized injection grouting method which is time tested, effective and guaranteed method.

Services We Offer
